```
}
```

```
let me = { name: "Isra" }
```

me.talk()

Isra

```
let you = { name: "Yo Momma" }
```

you.talk()

Yo Momma

- this value can change
- this.call(thisArg, ...argArray) aka additional parameters
- this.apply(thisArg, [...argArray])
- be careful when using arrow functions

- this goes inside a function

- this becomes the object furthest to the left (generally speaking)

- this is contextual, its value changes depending how you use it

- talk.call(this.variable name, parameters)
